South West

Healthy Schools Conference

DECIPHer at UNIVERSITY OF BRISTOL
PUBLIC HEALTH ENGLAND SOUTH WEST

27th June 2018
Somerset Cricket Club 10am – 4pm

This free conference will provide school leaders, governors and teachers, particularly those responsible for PSHE, RSE, safeguarding, mental health and promoting health and wellbeing, with up to date information about new government policy including the Mental Health Green Paper and statutory Relationship and Sex Education.

It will also provide up to date information on the impact of significant health trends on children and the relationship with academic attainment as well as providing the opportunity to learn about the most high impact approaches and how other schools are approaching these issues. It will also be of interest to other professionals working with schools including in public health, academia, the NHS and independent and third sectors and provide an opportunity to network and share learning across education and health sectors.

"I am delighted to see and welcome Public Health England's leadership of the Healthy Schools Conference, that they are organising with a range of stakeholders to promote the links between children's educational attainment and wellbeing and health. This is a great opportunity for academy chains to keep up to date on the latest policy, research, thinking and practice about children's mental health, statutory relationship and sex education, substance misuse and adverse childhood experiences and the way they impact on educational attainment and wellbeing."

Regional Schools Commissioner

The event will enable education and health professionals to get the latest information on:

- The Government's Green Paper on child and adolescent mental health and its impact on schools
- Implementation of Statutory Relationship and Sex Education and sharing of learning and best approaches
- The Ofsted thematic review of obesity
- The impact of Adverse Childhood Experiences on children's social and health outcomes and what action schools can take to mitigate them
- The impact of substance misuse and smoking on young people's health
- Best practice and the most high impact interventions that schools can put in place, including learning from other schools

To reserve your place at this free event please email Michelle Youd at Public Health England South West at michelle.youd@phe.gov.uk
