The number of completed scripts is:

	Year 8	Year 10	All
Male	286	304	590
Female	247	220	467
Valid responses	533	524	1057

Below where a note is made that the table is based on the "total sample", this refers to the number of cases submitted for analysis by the software (above).

The actual number of cases available for analysis for a given question may be less than this; a count of the "valid responses" for each question is given where possible, and if not a note will be made.

If the sample for a particular group is small, the number of percentage points represented by a single pupil will be relatively high.
