Male	256	268	524
Female	378	386	764
Total Sample (Count)	634	654	1288

Below where a note is made that the table is based on the "total sample", this refers to the number of cases submitted for analysis by the software (above).

The actual number of cases available for analysis for a given question may be less than this; a count of the "valid responses" for each question is given where possible, and if not a note will be made.

If the sample for a particular group is small, the number of percentage points represented by a single pupil will be relatively high.
